

# ELECTRICAL UTILITY ENGINEERING

The **electrical engineering** team at Providence, with more than 40 years of experience, can **accommodate all electric power needs** - from the power plant to the consumer. Our team has extensive experience with NEC, NESC, and RUS specifications and is **professionally licensed in 20 states**.

## SUBSTATION

Distribution Substations • Meter Points  
Transmission Switch Yards

## TRANSMISSION

New Construction • Hardening/Upgrades  
Transmission Line Devices

## DISTRIBUTION

Utility & Industrial High Voltage  
Specialty/Insulated Conductors & Cables  
Distribution Line Devices

## UNDERGROUND

Underground Subdivisions • Deep Borings  
Underground Utility Crossings

## CONSTRUCTION MANAGEMENT

Contract Administration • Contractor Services  
Design-Build Partnering

## INSPECTIONS & STUDIES

Construction/Work Order Inspections  
Joint Use Inspections • Power System Studies
